PROFILE

Full-stack developer with experience internship at IWS Solutions freelance client work, and several personal projects. I love integrating AI into applications to meet modern industry standards, having already worked with Gemini API across multiple projects. Strong on auth (JWT, RBAC, bcrypt) and comfortable end-to-end: React, Node/Express, MongoDB, and Python. I write clean code, learn fast, and want to be somewhere I can actually make an impact.

JWT / Refresh Tokens RBAC REST APIs React Node.js / Express MongoDB Python

EXPERIENCE

Web Developer Intern · IWS Solutions

Feb 2024 – Jan 2025

- Built a MERN-based Bulk Product Editor — import/export, inline editing, and bulk price/category updates.
- Developed Hotel Booking Web App features: booking flows, admin dashboards, and secure auth.
- Delivered responsive UIs using React, Tailwind CSS, and ShadCN UI; worked with MySQL and RESTful APIs.

Freelance Web Developer · Independent Client Work

2023 – Present

- Designed and developed a custom Wedding Website for a client couple — RSVP form, event timeline, photo gallery, and mobile-first responsive layout.
- Managed full project lifecycle: client requirements, design iterations, delivery, and post-launch updates.

PROJECTS

Crypto Prediction App · MERN · Google Gemini AI · JWT Auth

🔗 GitHub: <https://github.com/TariqCO/cryptoPrediction>

- Full-stack app for predicting cryptocurrency price movements with real-time result validation.
- Integrated Gemini AI to generate plain-language market summaries from user predictions.
- Implemented JWT authentication with refresh token rotation and protected route middleware.

Code Reviewer · Node.js · Express · Gemini API

🔗 GitHub: <https://github.com/TariqCO/ai-code-reviewer>

- AI-powered tool that accepts any code snippet and returns structured, actionable feedback.
- Clean Express backend handles Gemini API communication, rate limiting, and error responses.

Blog Application · MERN · JWT · Role-Based Access Control

🔗 GitHub: <https://github.com/TariqCO/blog-application>

- Full-stack blogging platform with registration, login, and post CRUD.
- RBAC — authors can only modify their own content; refresh token rotation for session security.

Python Projects · github.com/TariqCO/Python-Programme

- Password Manager · Cab Reservation System · Store Management System — CLI tools built with OOP, file I/O, and data structures covering real-world use cases.

SKILLS

Languages

JavaScript (ES6+), Python, HTML5, CSS3

Frontend	React.js, Tailwind CSS, ShadCN UI, Vite, Framer Motion
Backend	Node.js, Express.js, Socket.io, RESTful APIs
Database	MongoDB (Mongoose), MySQL
Auth	JWT, Refresh Tokens, bcrypt, RBAC
AI / APIs	Google Gemini API
Tools	Git, GitHub, Postman, VS Code

EDUCATION

Diploma in Frontend Development · Computer Collegiate
